

CERAMIC INFRARED HEATER ECX

The ECX and ECZ infrared radiators are the ceramic emitters of heating radiation, within the range of infrared waves, constructed in the form of a bulb with the E-27 thread shank. The radiators may be installed only in E-27 ceramic bulb fittings.

power [W]	50	100	125
Av. surface temp. [°C]	330	460	560
Wave length [μm]	5.0	4.0	3.5
